A large new military storage depot under construction 13 nm ENE of Cairo and 3 nm SE of Camp Huckstep was observed on [REDACTED]

[REDACTED] (Figure 1). The depot has small sheds which appear to be for fuze storage, and warehouses which are in closely spaced groups without blast protection (Inset, Figure 1). Each of the warehouses has a cutout section in one side of the roof. [REDACTED]

Pipeline ditches are being dug to serve the depot, and other pipelines carry waste to excavations which appear to be sumps. The depot has a system of blacktopped roads with extremely long turning radii which allow extra long truck trailers to be used at the depot. The purpose of this depot is not known.
